What is this product?	
Type	The company is a closed-ended investment company incorporated in England and Wales whose Ordinary Shares are admitted to the premium segment of the official list of the FCA and whose shares are admitted to trading on the London Stock Exchange plc’s main market for listed securities. Typically, at any given time on any given day, the price at which an Ordinary Share can be bought will be higher than the price at which an Ordinary Share can be sold.
Objectives	The Company's investment objective is to provide Shareholders with an attractive level of income, together with the potential for capital growth from investing directly in a portfolio of Social Homes, which the Company expects will benefit from inflation adjusted long-term leases or occupancy agreements with Approved Providers and to deliver, on a fully invested and geared basis, a targeted dividend yield of 5 per cent per annum (based on an Ordinary Share price of 100 pence), which the Company expects to increase broadly in line with inflation.
Intended retail investor	This product is intended for investors who understand the potential risk of capital loss of investment in shares which are publicly traded, that there may be limited liquidity in the underlying investments of the Company, for whom an investment in the shares is part of a diversified investment programme and who fully understand and are willing to assume the risks involved in such an investment.
Maturity date	This product has no maturity date.

This table shows the money you could get back over the next 5 Years, under different scenarios, assuming that you invest 10,000 GBP.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if G10 Capital Limited as AIFM is unable to pay out?

The Company is not required to make any payment to you in respect of your investment. As a Shareholder of the Company you would not be able to make a claim for compensation to the Financial Services Compensation Scheme in the event the Company is unable to pay out.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods.

They include potential early exit penalties. The figures assume you invest 10,000 GBP. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
